Humanitarian Intervention Brian D. Lepard, 2015-08-26 Few foreign policy issues in the past decade have elicited as much

controversy as the use of military force for humanitarian purposes In this book Brian Lepard offers a new method for analyzing humanitarian intervention that seeks to resolve conflicts among legal norms by identifying ethical principles embedded in the UN Charter and international law and relating them to a pivotal principle of unity in diversity A special feature of the book which avoids the charge of ethnocentricity brought against other approaches is that Lepard shows how passages from the revered texts of seven world religions may be interpreted as supporting these ethical principles In connecting law with ethics and religion in this way he takes a major step forward in the effort to formulate a normative basis for international law in our multicultural world

Damages for Violations of Human Rights Ewa Bagińska, 2015-10-20 This volume analyses the legal grounds premises and extent of pecuniary compensation for violations of human rights in national legal systems The scope of comparison includes liability regimes in general and in detail the correlation between pecuniary remedies available under international law and under domestic law and special alternative compensation systems All sources of human rights violations are embraced including historical injustices and systematic and gross violations The book is a collection of nineteen contributions written by public international law international human rights and private law experts covering fifteen European jurisdictions including Central and Eastern Europe the United States Israel and EU law The contributions initially prepared for the 19th International Congress of Comparative law in Vienna 2014 present the latest developments in legislation scholarship and case law concerning domestic causes of action in cases of human rights abuses The book concludes with a comparative report which assesses the developments in tort law and public liability law the role of the constitutionalisation of the right to damages as well as the court practice related to the process of enforcement of human rights through monetary remedies This country by country comparison allows to consider whether the value of protection of human rights as expressed in international treaties *ius cogens* and in national constitutional laws justifies the conclusion that the interests at stake should enjoy protection under the existing civil liability rules or that a new cause of action or even a whole new set of rules should be created in national systems

The Case for Gay Rights David A. J. Richards, 2005 As Americans wrestle with debates over traditional values defense of marriage and gay rights reason often seems to take a back seat to emotion In response legal scholar Richards reflects upon the constitutional and democratic principles relating to privacy intimate life free speech tolerance and conscience that underpin these often heated debates The distillation of Richards s thirty year advocacy for the rights of gays and lesbians his book provides a reflective treatise on basic human rights that touch all of our lives He places in context two key Supreme Court cases the 1986 *Bowers v Hardwick* decision and the 2003 *Lawrence v Texas* decision which overturned it Drawing upon his own experiences as a gay man Richards interweaves personal observations with philosophical political judicial and psychological insights to make a case that gays should be entitled to the same rights and protections that every American enjoys From publisher description
