## **Gender And Science Reader:**

**The Gender and Science Reader** Muriel Lederman, Ingrid Bartsch, 2001 The Gender and Science Reader brings together key writings by leading scholars to provide a comprehensive feminist analysis of the nature and practice of science. Challenging the self-proclaimed objectivity of scientific practice, the contributors uncover the gender, class, and racial prejudices of modern science. The Reader draws from a range of media including feminist criticism, scientific literature, writings about scientific education, and the popular press. Articles are grouped into six thematic sections which address: Women in Science, women's access to study and employment in science, combining both analytical evidence and personal testimonies; Creating Andocentric Science, exploring the gendered origins of science at the time of the Enlightenment; Analyzing Gendered Science, feminist methodologies and epistemology for the study of science; Gendered Praxis, examples of how gender bias can affect and distort scientific work; Science and Identity, how science reinforces gender and racial stereotypes; Feminist Re-Structuring of Science, what is the future of feminist science studies. In addition to a general introduction by the editors to the volume and introductions to each of the thematic sections, the Reader also includes a comprehensive bibliography of feminist science studies, making it an indispensable resource for anyone involved in the teaching, research, or study of science.

**Reader** Joke 't Hart, *Gender, Science, and Authority in Women's Travel Writing* Michelle Medeiros, 2019-04-15 Gender, Science, and Authority in Women's Travel Writing: Literary Perspectives on the Discourse of Natural History analyzes the interrelations among authority, gender, and the scientific discipline of natural history in the works of transatlantic women travelers from the nineteenth and early twentieth centuries. Michelle Medeiros sheds new light on our understanding of the literary perspectives of the discourse of natural history and how these viewpoints had a surprising impact in areas that went beyond scientific fields. This book advances the study of travel writing and gender in new directions by bringing together Latin American, European, and American women travelers who actively engaged in natural history discussions in their writings. By demonstrating how these women were only able to participate in intellectual enterprises by embarking on transatlantic voyages, this book discloses how the work produced by these travelers challenged

and reshaped dominant discourses bringing a new point of view to nineteenth and twentieth centuries studies in Latin American history literature cultural studies and history of science Moreover this book analyzes to what extent the approaches employed by female travel writers who wanted to engage in the production of knowledge has evolved in that time period and to what degree such changes could be considered positive and more productive

Gender Virginia Scharff, 2003 Environmental history has traditionally told the story of Man and Nature. Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender. Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history, showing how women's actions, desires, and choices have shaped the world and seeing men as gendered actors as well. In thirteen essays that show how gendered ideas have shaped the ways in which people have represented, experienced, and consumed their world, Virginia Scharff and her coauthors explore interactions between gender and environment in history. Ranging from colonial borderlands to transnational boundaries, from mountaintop to marketplace, they focus on historical representations of humans and nature, on questions about consumption, on environmental politics, and on the complex reciprocal relations among human bodies and changing landscapes. They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies. Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly, often with dire consequences for other people and organisms. Here are considerations of the ways we study sexuality among birds, of William Byrd's masking sexual encounters in his account of an eighteenth-century expedition, of how the ecology of fire in a changing built environment has reshaped firefighters' own gendered identities. Some are playful, as in a piece on the evolution of snow bunnies to shred bunnies. Others are dead serious, as in a chilling portrait of how endocrine disruptors are reinventing humans, animals, and water systems from the cellular level out. Aiding and adding significantly to the enterprise of environmental history, *Seeing Nature through Gender* bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet.
