Women and Gender Janice D. Yoder, 1999 Well grounded in research this accessible book presents psychology as it has been transformed and is being transformed by women It

discusses the changes that a feminist vision of psychology has made in everything from the methods used to the topics studied. With its solid grounding in contemporary feminist scholarship, this book focuses on important issues such as violence against women, health, psychology, work, family, balance, development across the life course, and sexist discrimination. Written to be reader-friendly, the book weaves a cohesive story that delivers its main points in a clear and straightforward manner. And rather than separating women's experiences by stereotyped subgroups, this book integrates the diversity of women's experiences to present as inclusive a picture as possible of women and women's lives. An essential reference on feminist influence in psychology for every professional in psychology and sociology.

Seminar paper from the year 2006 in the subject English Language and Literature Studies. Literature grade 1.3. University of Freiburg. Englisches Seminar course Proseminar I. 18 entries in the bibliography. Language: English. Abstract: Without a doubt, the Victorian age can be considered as a very vibrant era, an age of change and development, a time of expansion, reforms, and of technological and scientific advance. It was only natural that these changes would affect the traditional religious and social beliefs and conventions as well. The conventional gender system with its strict hierarchy and role expectations was mostly still intact, and sexuality and corporeality were considered to be taboo subjects. Nevertheless, it was exactly this attempt to avoid sexuality and gender topics which led to sometimes excessive discussions about these issues, for example, the so-called Great Evil of prostitution and related to that, the enforcement of the Contagious Disease Acts in the 1860s. These discussions, however, made many Victorians, for example, the New Women, that formed the basis for the later on emerging feminism, aware of the injustice of the status quo and led to a questioning of the traditional separate spheres ideology. The ideas of womanhood and masculinity had to be discussed and to be adapted to a new age. Although the stereotype of the uptight Victorian lives on until today, the literature of this time, since literature always mirrors the cultural climate of the society in which it came into being, demonstrates the Victorian's interest in gender questions. In this paper, Robert Browning will serve as an example for a poet highly aware of these ongoing changes. In his dramatic monologue *Porphyria's Lover*, he takes up the gender issue and deals with femininity, manliness, and sexuality. The first chapter of this paper will give some information about the form of the dramatic monologue as a special means to present a person's inner life and furthermore.
