Comprehensive Organic Functional Group Transformations Alan R. Katritzky, Stanley M. Roberts, Otto Meth-Cohn, Charles Wayne Rees, 1995 This Volume covers the formation of carbon carbon single double and triple bonds by substitution and addition reactions as well as by various rearrangements The formation of carbon carbon multiple bonds by elimination and condensation procedures is fully documented In addition the synthesis of carbon hydrogen bonds principally by substitution and addition reactions is featured as is the preparation of a wide variety of carbon centred anions cations and radicals

Review of Organic Functional Groups Thomas L. Lemke, 2003 Designed to be used as a self paced review this text outlines the functional groups common to organic chemistry reviewing the general topics of nomenclature physical and chemical properties and metabolism The text provides background material for the formal pharmacy courses in medicinal chemistry easing the transition from general organic chemistry courses required of all pre pharmacy students The Fourth Edition will include a workbook on CD ROM as well as an index on general drug metabolism Students who use this text are able to complete difficult tasks such as drawing a chemical structure or official chemical name predicting solubility of chemicals in liquids predicting and showing with chemical structures the metabolism of organic functional groups predicting and showing instabilities with chemical structures

Infrared and Raman Characteristic Group Frequencies George Socrates, 2004-06-18 The third edition of this highly successful manual is not only a revised text but has been extended to meet the interpretive needs of Raman users as well as those working in the IR region The result is a uniquely practical comprehensive and detailed source for spectral interpretation Combining in one volume the correlation charts and tables for spectral interpretation for these two complementary techniques this book will be of great benefit to those using or considering either technique In addition to the new Raman coverage the new edition offers new section on macromolecules including synthetic polymers and biomolecules expansion of the section on NIR near infrared region to reflect recent growth in this area extended chapter on inorganic compounds including minerals and glasses redrawn and updated charts plus a number of new charts covering data new to this edition This new edition will be invaluable in every industrial university government and hospital laboratory where infrared FT IR and Raman spectral data need to be analysed
