TDOS Solutions Peter Greenlaw, 2017-03-21 For over a decade, health and wellness expert Peter Greenlaw has studied the top researchers. His review of research looked at the effects on human health of environmental toxins, nutritional deficiency, overweight, and stress. Now he connects the dots, showing how the interconnections are amplifying these four health-robbing co-factors: Toxicity, Deficiency, Overweight, Stress into a deadly syndrome that's killing us. How can the human race absorb and process over 700 tons of toxins from the air we breathe every day? What happens as we consume hormones, steroids, pesticides, antibiotics, and birth control chemicals in every glass of water? Why are there 275 lethal toxins found in newborn babies? And girls as young as three are showing signs of puberty? Connect the dots to see how toxins, depleted nutrients, overweight, stress, adds up to the perfect storm that's costing us our health. Until Peter Greenlaw, the researcher on researchers connected the dots, no one acknowledged the big picture and sounded the alarm. Now the facts are clear. The entire spectrum of research tells a bigger health story than we've been led to believe. Disregard these facts at your peril. Peter Greenlaw has gained enormous support from top experts and authorities across the health and medical global.
