## **Hearing In Time:**

*Hearing in Time* Justin London, 2012-05-03 Our sense that a waltz is in three or a blues song is in four with a shuffle comes from our sense of musical meter *Hearing in Time* explores the metric aspect of our musical experience from a psychological point of view Musical meter is subject to a number of fundamental perceptual and cognitive constraints These constraints are the cornerstones of *Hearing in Time*'s account of musical meter *Hearing in Time* also takes into account the fact that listening to music like many other rhythmic activities is something that we do a lot It also approaches meter in the context of music as it is actually performed with nuances of timing and dynamics rather than as a theoretical idealization *Hearing in Time*'s approach to meter is not based on any particular musical style or cultural practice and it discusses musical examples from a wide range of musical styles and cultures from Beethoven and Bach to Brubeck and Ghanaian Ewe drumming In taking this broad approach a number of fundamental similarities between a variety of different metric phenomena such as the difference between so called simple versus complex or additive meters become apparent Requiring only a modest ability to read a musical score *Hearing in Time* is written for musicians musicologists and music theorists as well as psychologists linguists and cognitive scientists who are interested in rhythm and meter
