Foundations In Public Economics:

Foundations in Public Economics David A. Starrett, 1988-06-24 Discusses the major theoretical foundations of modern public sector economics Includes market failures encompassing externalities pure public goods local public goods and natural monopolies Representative voting benefit cost analysis incentive compatible design mechanisms and the free market are points also covered Special attention is paid to financial arrangements techniques for eliciting necessary information and identification of biases that will result from incorrect procedures

The Behavioral Foundations of Public Policy Eldar Shafir, 2013 Includes bibliographical references and index

The Foundations of Economic Policy Nicola Acocella, 1998-10 Recent developments in public economics have largely been in the direction of reaffirming the limits of the market and of establishing new ones The possible existence of fundamental non convexities imperfect and asymmetric information incentive compatibility imperfect competition strategic complementarity and scale economies led to the conclusion that a large set of market failures exist such situations also imply government failure Acocella considers this complicated picture and provides a discussion of the different approaches to establishing social rankings of the possible situations and the underlying principles The arguments for and against different institutions are then analysed at a micro and macroeconomic level The market and the government are recognised as imperfect and thus complementary institutions Specific policy targets and instruments are considered in the areas of micro and macro economic policy Special attention is devoted to questions of policy management in an open economy Finally problems of domestic and international policy co ordination are considered

Institutional Foundations of Public Finance Alan J. Auerbach, 2008 Auerbach integrates economic and legal perspectives on taxation and fiscal policy offering a provocative assessment of the most important issues in public finance today

Institutional Foundations of Public Finance Alan J Auerbach, Daniel N. Shaviro, 2008

The Economic Foundations of Government Randall G. Holcombe, 1994-01-01 Government is analysed as the product of exchange among individuals who differ in their bargaining power This approach shows why individuals agree to political institutions that give their governments extensive power and why even the most powerful government benefits from constitutional rules constraining the government s power This foundation is used to examine a wide range of government activities including its protection of rights its military activities and democratic political institutions

Philanthropic Foundations, Public Good and Public Policy Diana Leat, 2016-06-10 This book discusses a series of related but independent challenges faced by philanthropic foundations drawing on international contemporary and historical data Throughout the world private philanthropic foundations spend huge sums of money for public good while the media policy makers and the public have little understanding of what they do and why Diana Leat considers the following questions Are philanthropic foundations more than warehouses of wealth Where does foundation money come from and is there a tension between a foundation s ongoing sources of income and its pursuit of public good How are foundations regulated and held accountable in society Is there any evidence that foundations are

effective in what they do Is it possible to have too much philanthropy In posing these questions the book explores some of the key tensions in how foundations work and their place in democratic societies **Fundamentals of Public Economics**

Jean-Jacques Laffont,2008-07 This text by one of Europe s leading economists covers a wide variety of public economics issues with great clarity and precision illustrating them with a wealth of carefully chosen examples and problems Starting from theories of general equilibrium analysis Laffont considers issues of market failure collective decisionmaking and distributional equity He analyzes the important informational and motivational problems involved in planning solutions for market failures and provides a rigorous justification for the theoretical foundations of public economics Topics include the theories of externalities public goods collective choice consumer surplus cost benefit analysis and or theory of the second best incomplete markets and nonconvexities For each Laffont begins with the classical foundations moves on to consider the topic within a simple model of the economy and concludes by integrating results from recent journal articles into this simple framework In this way students are led to understand the classical tradition in the context of modern general equilibrium theory The book concludes with eight problems with solutions each interesting and rich enough to be considered a case study and nine exercises without solutions together they provide an excellent review of material covered in the text The basic approach in each problem is to set up a general equilibrium model discover the market failure by calculating the unfettered equilibrium and develop an explicit planning solution Jean Jacques Laffont is Professor of Economics at the University of Social Sciences at Toulouse Fundamentals of Economics may be used in either an advanced graduate level course in public economics or in conjunction with a second volume forthcoming by the same author in a course in advanced microeconomics
