**Five-Day Course in Thinking** Edward de Bono,2016-08-25 First published in 1967 this remarkable title from one of history s greatest minds remains a must read in the world of creative thinking Based on the tenet that an error can lead to the right decision de Bono guides the reader through a series of non mathematical problems and puzzles all designed to help us analyse our personal style of thinking work out its strengths and weaknesses and to consider the potential methods that we never use There are three courses each five days long and each created to focus on a different style of thinking featuring The Bottles Problem The Blocks Problem The L Game The End Game A true life changer this book will have you thinking in ways that you never thought were possible *The Five Day Course in Thinking* Edward De Bono,1968 Edward de Bono believes that thinking is an enjoyable skill that it is neither a painfully boring duty nor a pile of facts and semantic tricks This skill can be developed directly not as the by product of a conventional education spent learning something else This book offers a series of simple but intriguing problems in thinking that require no special knowledge and no mathematics The problems are designed to let the reader find out about his own personal style of thinking its weakness and strenghts and the methods latent in himself that he never uses Being right is not always important an error can lead to the right decision Publishers description [The 5 Day Course in Thinking](#) Edward De Bono,1967 **Critical Thinking and Education** John E. McPeck,2016-09-13 The skills of critical thinking occupy a contentious place in debates on education It is of course widely recognised that education must consist of more than an unreasoning accumulation of facts and skills and that modern society demands a highly developed critical awareness to cope with its ever increasing complexities Yet the very term critical thinking threatens to become a vague and unexamined slogan displayed more in party tricks than in useful knowledge In this book first published in 1981 Professor McPeck offers a critique of the major ideas and important work in the field including those of Ennis and de Bono while at the same time presenting his own rigorous ideas on the proper place in critical thinking in the philosophy of education The book aims to establish a sound basis on which the role of critical thinking in schools can be evaluated and the author makes a strong case for the contribution it can make to resolving current dilemmas of the curriculum **The Five-Day Course in Thinking , Life Skills Curriculum: ARISE Droupout Prevention, Book 1: So You're Thinking of Dropping Out of School (Instructor's Manual)** ,2011-07 *Design Thinking in Higher Education* Gavin Melles,2020-08-19 This book addresses the contributions of design thinking to higher education and explores the benefits and challenges of design thinking discourses and practices in interdisciplinary contexts With a particular focus on Australia the USA and UK the book examines the value and drawbacks of employing design thinking in different disciplines and contexts and also considers its future [The 5 Day Course in Thinking](#) Edward De Bono,1969 **Infantry** ,2012-04 **5 Day Course In Thinking** Edward de Bono,1967-01-21 Introduces a series of intriguing problems to challenge and stimulate the reader s ability to think **Futuristic Education and Creative Thinking Skills**
