PART 1

Questions:

1. What is a slide "Transition"?

Switching a presentation, or slide transition is the visual effect that occurs when you move from one slide to the next.

2. Why wouldn't you have your slides with different types of transitions?

When making transitions, you can choose one type from a list of five. If you use different transitions all the time, your presentation will look like it was made for a particular set of circumstances.

3. What is an Animation?

Adding life to any object in a program, graphics or text animation is all about.

4. What is the Animation Pane?

The Animation Pane lets you see and manage all active effects on the current slide.

5. How many animation styles should be applied to a presentation? One style, 10 styles or 20 styles? Explain.

Just one will be the most effective in the eyes of an audience. If you use a variety of animations, your presentation will look strange, clumsy and unprofessional.

6. What are Animations?

The PowerPoint animation feature allows you, the presenter, to deal with your most challenging presentations. You can accomplish this by combining a presentation in slide show mode.
