Mediterranean Encounters Fariba Zarinebaf, 2018-07-24

Mediterranean Encounters traces the layered history of Galata a Mediterranean and Black Sea port to the Ottoman conquest and its transformation into a hub of European trade and diplomacy as well as a pluralist society of the early modern period Framing the history of Ottoman European encounters within the institution of ahnames commercial and diplomatic treaties this thoughtful book offers a critical perspective on the existing scholarship For too long the Ottoman empire has been defined as an absolutist military power driven by religious conviction culturally and politically apart from the rest of Europe and devoid of a commercial policy By taking a close look at Galata Fariba Zarinebaf provides a different approach based on a history of commerce coexistence competition and collaboration through the lens of Ottoman legal records diplomatic correspondence and petitions She shows that this port was just as cosmopolitan and pluralist as any large European port and argues that the Ottoman world was not peripheral to European modernity but very much part of it

Latins, Greeks and Muslims: Encounters in the Eastern Mediterranean, 10th-15th Centuries David Jacoby, 2023-05-31 Trade shipping military conquest migration and settlement in the eastern Mediterranean of the 10th 15th centuries generated multiple encounters between states social and national groups and individuals belonging to Latin Christianity Byzantium and the Islamic world The nature of these encounters varied widely depending on whether they were the result of cooperation rivalry or clashes between states the outcome of Latin conquest which altered the social and legal status of indigenous subjects or the result of economic activity They had wide ranging social and economic repercussions and shaped both individual and collective perceptions and attitudes These often differed depending upon nationality standing within the dominant or subject social strata or purely economic considerations In any event at the individual level common economic interests transcended collective national and cultural boundaries except in times of crisis The studies in this latest collection by David Jacoby explore the multiple facets of these eastern Mediterranean encounters and their impact upon individual economic activities with special attention to the other outsiders in foreign environments foreign privileged versus indigenous traders the link between governmental intervention naturalization and fiscal status as well as the interaction between markets and peasants

Blitzkrieg to Desert Storm Robert Michael Citino, 2004 When Germany launched its blitzkrieg invasion of France in 1940 it forever changed the way the world waged war Although the Wehrmacht ultimately succumbed to superior Allied firepower in a two front war its stunning operational achievement left a lasting impression on military commanders throughout the world even if their own operations were rarely executed as effectively Robert Citino analyzes military campaigns from the second half of the twentieth century to further demonstrate the difficulty of achieving decisive results at the operational level Offering detailed operational analyses of actual campaigns Citino describes how UN forces in Korea enjoyed technological and air superiority but found the enemy unbeatable provides analyses of Israeli operational victories in successive wars until

the Arab states finally grasped the realities of operational level warfare in 1973 and tells how the Vietnam debacle continued to shape U S doctrine in surprising ways Looking beyond major power conflicts he also reveals the lessons of India s blitzkrieg like drive into Pakistan in 1971 and of the senseless bloodletting of the Iran Iraq War Citino especially considers the evolution of U S doctrine and assesses the success of Desert Storm in dismantling an entrenched defending force with virtually no friendly casualties He also provides one of the first scholarly analyses of Operation Iraqi Freedom showing that its plan was curiously divorced from the realities of military history grounded instead on nebulous theories about expected enemy behavior Throughout Citino points to the importance of mobility especially mobilized armor in modern operational warfare and assesses the respective roles of firepower training doctrine and command and control mechanisms Brimming with new insights Citino s study shows why technical superiority is no guarantee of victory and why a thorough grounding in the history of past campaigns is essential to anyone who wishes to understand modern warfare Blitzkrieg to Desert Storm provides that grounding as it addresses the future of operational level warfare in the post 9 11 era , **Encountering**

Heresy in the University Jacques Berlinerblau,1999 One of the most controversial books to come out of the academy in the last fifteen years is Martin Bernal s Black Athena It has been a true cause celebre Afrocentrists have both praised the

book and claimed that Bernal stole from the work of black scholars to create his study of the Afroasiatic roots of classical civilization Classicists feel passionately about what they perceive as an attack from an outsider on the origins not only of ancient Greece but of their own discipline It seems that everyone has something to say about the book the question is how many really understand it In Heresy in the University Jacques Berlinerblau provides an exegesis of the contents of *Black Athena* making it accessible to a wider audience As he clarifies and restates Bernal's opus Berlinerblau identifies Bernal's flaws in reasoning and gaps in evidence He cuts to the heart of Bernal's prose singling out the key points of Bernal's argument explaining and arranging them in a cogent manner Berlinerblau addresses the critics' really important objections including his own and links each of them to the appropriate substantive argument in *Black Athena* He goes beyond simple summary and exposition to present the underlying stated and unstated agendas of Bernal and his critics Ultimately he exposes both sides and asks what the flawed reasoning from all concerned reveals about the stakes in this key academic dispute and what that in turn says about the modern academy Jacques Berlinerblau is an assistant professor and director of Judaic studies at Hofstra University
