Enculturación Matemática

David Mora

Enculturación Matemática:

Enculturación matemática Alan J. Bishop, 1999 Este libro abre nuevos caminos en el campo de la educación científica pues considera que la matemática es un producto natural Se trata de una idea a la vez sencilla y profunda Para empezar es sencilla porque el sentido común nos dice que todo conocimiento tiene que ser un producto cultural Durante los últimos años las investigaciones antropológicas e interculturales han generado una multitud de datos que no solo corroboran esta perspectiva sino que también nos permiten comprender realmente su significado y su importancia Así esta obra demuestra y confirma el significado de la matemática como producto cultural Se inspira en una amplia variedad de fuentes y referencias e integra toda esta bibliografía en un nuevo esquema conceptual También como decíamos se trata de una idea profunda a causa de su desarrollo potencial en el terreno de la educación matemática Bishop no se contenta con un mero examen de la esfera cultural sino que también explora los aspectos significativos de ese desarrollo Presenta una estructura curricular que genera nuevos procedimientos e ideas además de respaldar otros ya existentes Pero la enculturación no solo aborda el contenido curricular También trata de procesos Y en este libro se explora a fondo el proceso de la enculturación matemática Alan Bishop es profesor del Departamento de Educación de la Universidad de Cambridge Matemática emocional Inés Ma Gómez Chacón, 2023-05-15 La experiencia que se describe en este libro nace de la reflexión desarrollada por la autora en torno a la búsqueda de propuestas alternativas para estudiantes que fracasan en la matemática escolar El trabajo que aquí se ofrece representa un logro tanto en la integración de la perspectiva afectiva y cognitiva en las situaciones de enseñanza y aprendizaje como en el planteamiento que se propone de formación del profesorado Este libro contiene una propuesta práctica til a cualquier persona que quiera examinar la interacción entre razón y emoción en sí misma y en otros Se ofrecen además estrategias apropiadas para trabajar los procesos mentales involucrados en las emociones y algunos elementos curriculares para llevar a cabo un programa de intervención en las instituciones educativas **Etnografía educativa y matemática en Caracollo** Gregorio Gabriel Colque, 2005 *Ubiratan D'Ambrosio and Mathematics Education* Marcelo C. Borba, Daniel C. Orey, 2023-06-24 This edited volume is written in memoriam of Professor Emeritus Ubiratan D'Ambrosio 1932-2021 who was a well known Brazilian mathematics educator and historian of mathematics This book explores the diverse facets of D'Ambrosio's work as well as his legacy and the later adaptation of his ideas around the globe It starts with a preface written by his son Alexandre D'Ambrosio who shares his personal experiences growing up with this father and his love for discovery The book is then divided into four sections Past and Future Ubi's Way of Seeing Education in the Present Roots of Ethnomathematics Ethnomathematics in Action Trends in Ethnomathematics It features diverse points of view and experiences that explore mathematics and culture from researchers in the Americas Africa Europe and South Asia Chapters range from personal explorations of D'Ambrosio's impact to broader views of his research and work This book forms part of the growing understanding of Ubiratan D'Ambrosio's life research and the legacy he has left for millions of researchers

students and teachers worldwide This book is appealing to anyone involved in mathematics education research as well as those interested in the history and future of mathematics education

Mathematics And Its Teaching In The Southern Americas: With An Introduction By Ubiratan D'ambrosio Hector Rosario, Bruce R Vogeli, Patrick Scott, 2014-09-26 This anthology presents a comprehensive review of mathematics and its teaching in the following nations in South America Central America and the Caribbean Argentina Bolivia Brazil Chile Colombia Costa Rica Cuba Guyana Haiti Honduras Mexico Panama Paraguay Peru Puerto Rico Trinidad and Tobago and Venezuela The last summary of mathematics education encompassing countries from the Southern Americas appeared in 1966 Progress in the field during five decades has remained unexamined until now

Matemáticas. Investigación, innovación y buenas prácticas Vicen Font Moll, 2011-06-22 Este libro se ha escrito pensando en la necesidad de aportar materiales que sirvan para trabajar las competencias profesionales relacionadas con los procesos de investigación e innovación en el aula las cuales son una parte fundamental de las competencias profesionales que queremos desarrollar Las buenas prácticas que se incluyen en este libro pretenden ejemplificar a nivel del aula muchas de las ideas desarrolladas en los apartados destinados a los procesos de investigación e innovación citados anteriormente tanto para el profesorado en formación inicial Máster de Secundaria como para los docentes en ejercicio que deseen potenciar su desarrollo profesional

Mathematical Enculturation Alan Bishop, 1991-06-30 Mathematics is in the unenviable position of being simultaneously one of the most important school subjects for today's children to study and one of the least well understood Its reputation is awe inspiring Everybody knows how important it is and everybody knows that they have to study it But few people feel comfortable with it so much so that it is socially quite acceptable in many countries to confess ignorance about it to brag about one's incompetence at doing it and even to claim that one is mathophobic So are teachers around the world being apparently legal sadists by inflicting mental pain on their charges Or is it that their pupils are all masochists enjoying the thrill of self inflicted mental torture More seriously do we really know what the reasons are for the mathematical activity which goes on in schools Do we really have confidence in our criteria for judging what's important and what isn't Do we really know what we should be doing These basic questions become even more important when considered in the context of two growing problem areas The first is a concern felt in many countries about the direction which mathematics education should take in the face of the increasing presence of computers and calculator related technology in society
