Functional Programming, Concurrency, Simulation and Automated Reasoning Peter E. Lauer,1993-06-16 This collection of papers arose from a series of lectures for workers in computer science and other disciplines The lectures were intended to familiarize them with some of the most exciting advanced computer based systems for the conceptualization design implementation simulation and logical analysis of applications in these disciplines The collection presents some strong motivational points for the use of theory based systems in the areas of functional programming concurrency simulation and automated reasoning highlighting some of their advantages and disadvantages relative to conventional systems The papers are mostly the work of individuals who were among the originators of the systems presented The volume is intended as a contribution to narrowing the learning gap facing conventional computer users when they wish to use advanced theory based systems The papers are meant for a wide audience and should not require great mathematical sophistication for their comprehension The papers contain numerous references for those wishing to pursue a topic in greater depth Functional Programming, Concurrency, Simulation and Automated Reasoning Peter E. Type And Effect Systems: Behaviours For Concurrency Torben Amtoft,Hanne Riis Nielson,Flemming Nielson,1999-03-12 Concurrent and distributed processes occur everywhere in embedded systems in information networks and databases and in the form of applets roaming around on the World Wide Web This book presents and develops state of the art validation techniques for detecting safety violations the focus is on the correctness of techniques that suffice for fully automatic validation of key components of such systems It builds on and extends the notion of types popular in many sequential programming languages as a technique for catching certain kinds of errors already at program development time by incorporating behaviours or structured effects that are able to track the information flow in the presence of procedures channel based communication and the dynamic creation of network topologies The technical development is performed for a language based on Concurrent ML

ML with Concurrency Flemming Nielson,2012-12-06 Both functional and concurrent programming are relatively new paradigms with great promise In this book a survey is provided of extensions to Standard ML one of the most widely used functional languages with new primitives for concurrent programming Computer scientists and graduate students will find this a valuable guide to this topic

Process Algebra for Parallel and Distributed Processing Michael Alexander,William Gardner,2008-12-22 Collects the Latest Research Involving the Application of Process Algebra to Computing Exploring state of the art applications Process Algebra for Parallel and Distributed Processing shows how one formal method of reasoning process algebra has become a powerful tool for solving design and implementation challenges of concurrent systems
