Generalized Boltzmann Physical Kinetics:

Generalized Boltzmann Physical Kinetics Boris V. Alexeev, 2004-05-25 The most important result obtained by Prof B Alexeev and reflected in the book is connected with new theory of transport processes in gases plasma and liquids It was shown by Prof B Alexeev that well known Boltzmann equation which is the basement of the classical kinetic theory is wrong in the definite sense Namely in the Boltzmann equation should be introduced the additional terms which generally speaking are of the same order of value as classical ones It leads to dramatic changing in transport theory The coincidence of experimental and theoretical data became much better Particularly it leads to the strict theory of turbulence and possibility to calculate the turbulent flows from the first principles of physics Boltzmann equation BE is valid only for particles which can be considered as material points generalized Boltzmann equation GBE removes this restriction GBE contains additional terms in comparison with BE which cannot be omitted GBE leads to strict theory of turbulence GBE gives all micro scale turbulent fluctuations in tabulated closed analytical form for all flows GBE leads to generalization of electro dynamic Maxwell equations GBE gives new generalized hydrodynamic equations GHE more effective than classic Navier Stokes equations GBE can be applied for description of flows for intermediate diapason of Knudsen numbers Asymptotical solutions of GBE remove contradictions in the theory of Landau damping in plasma

Unified Non-Local Theory of Transport Processes Boris V. Alexeev, 2015-02-10 Unified Non Local Theory of Transport Processes 2nd Edition provides a new theory of transport processes in gases plasmas and liquids It is shown that the well known Boltzmann equation which is the basis of the classical kinetic theory is incorrect in the definite sense Additional terms need to be added leading to a dramatic change in transport theory The result is a strict theory of turbulence and the possibility to calculate turbulent flows from the first principles of physics Fully revised and expanded edition providing applications in quantum non local hydrodynamics quantum solitons in solid matter and plasmas Uses generalized Boltzmann kinetic theory as an highly effective tool for solving many physical problems beyond classical physics Addresses dark matter and energy Presents non local physics in many related problems of hydrodynamics gravity black holes nonlinear optics and applied mathematics

Unified Non-Local Relativistic Theory of Transport Processes Boris V. Alexeev, 2016-08-21 Unified Non Local Relativistic Theory of Transport Processes highlights the most significant features of non local relativistic theory which is a highly effective tool for solving many physical problems in areas where the classical local theory runs into difficulties The book provides the fundamental science behind new non local physics generalized for relativistic cases and applied in a range of scales from transport phenomena in massless physical systems to unified theory of dissipative structures The book complements the author's previous monograph on Unified Non Local Theory of Transport Processes Elsevier 2015 which is mainly devoted to non relativistic non local physics Nevertheless the theory as handled in this new work is outlined independently so the book can be studied on its own Comprehensive collection of non local relativistic theory with examples that could previously only be found scattered in the

literature Provides applications in quantum non local relativistic hydrodynamics quantum solitons in solid matter and plasmas Uses generalized non local kinetic theory as a highly effective tool for solving many physical problems beyond classical physics Presents non local relativistic physics in many related problems of hydrodynamics gravity nonlinear optics time quantization and applied mathematics Includes concrete mathematical problems that are physically consistent and can be solved and studied both analytically and numerically

Proceedings of the IV Advanced Ceramics and Applications Conference Bill Lee, Rainer Gadow, Vojislav Mitic, 2017-01-16 This is the Proceedings of III Advanced Ceramics and Applications conference held in Belgrade Serbia in 2014 It contains 25 papers on various subjects regarding preparation characterization and application of advanced ceramic materials

Nonlocal Astrophysics Boris V. Alexeev, 2017-07-17 Non Local Astrophysics Dark Matter Dark Energy and Physical Vacuum highlights the most significant features of non local theory a highly effective tool for solving many physical problems in areas where classical local theory runs into difficulties The book provides the fundamental science behind new non local astrophysics discussing non local kinetic and generalized hydrodynamic equations non local parameters in several physical systems dark matter dark energy black holes and gravitational waves Devoted to the solution of astrophysical problems from the position of non local physics Provides a solution for dark matter and dark energy Discusses cosmological aspects of the theory of non local physics Includes a solution for the problem of the Hubble Universe expansion and of the dependence of the orbital velocity from the center of gravity

Physics, Uspekhi, 2003 **Rarefied Gas Dynamics** M. Capitelli, 2005-06-21 The book contains papers presented at the 24th International Symposium on Rarefied Gas Dynamics a conference that is recognized as the principal forum for the presentation of recent advances in the field of rarefied gas dynamics The topics include fundamental aspects of Boltzmann and related equations transport theory Monte Carlo methods kinetic theory gas phase molecular collision dynamics gas surface interaction state to state kinetics rarefied plasmas and non equilibrium plasma kinetics Applications in the fields of internal flows vacuum systems rarefied jets plumes molecular beams scramjets and hypersonics microflows granular gases electrical thrusters are discussed Researchers in the fields of mathematics physics chemistry and engineering can strongly benefit from the interdisciplinary nature of the book

International Aerospace Abstracts, 1998 *Rarefied Gas Dynamics*, 2009 *Proceedings*, 2008 *Theoretical Physics: Quantum statistics and physical kinetics* Veniamin Grigor'evich Levich, 1971 *Lecture Notes On The Mathematical Theory Of Generalized Boltzmann Models* Nicola Bellomo, Mauro Lo Schiavo, 2000-01-11 This book is based on the idea that Boltzmann like modelling methods can be developed to design with special attention to applied sciences kinetic type models which are called generalized kinetic models In particular these models appear in evolution equations for the statistical distribution over the physical state of each individual of a large population The evolution is determined both by interactions among individuals and by external actions Considering that generalized kinetic models can play an important role in dealing with several interesting systems in applied

sciences the book provides a unified presentation of this topic with direct reference to modelling mathematical statement of problems qualitative and computational analysis and applications Models reported and proposed in the book refer to several fields of natural applied and technological sciences In particular the following classes of models are discussed population dynamics and socio economic behaviours models of aggregation and fragmentation phenomena models of biology and immunology traffic flow models models of mixtures and particles undergoing classic and dissipative interactions

Theoretical and Mathematical Physics, 1993 Research in Engineering and Applied Science at Cornell University, 1987 Nanodesign, Technology, and Computer Simulations Alexander I. Melker, Teodor Breczko, 2007 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics These books provide prompt access to the latest innovations in research and technology in their respective fields Proceedings of SPIE are among the most cited references in patent literature **Fluid Mechanics: Soviet Research**, 1977 **Kinetic Theory: Irreversible processes** Stephen G. Brush, 1966 American Book Publishing Record, 2003 Kinetic Problems of Non-linear Spectroscopy Sergeĭ Glebovich Rautian, Anatoliĭ Mikhaĭlovich Shalagin, 1991 This book is devoted to theoretical nonlinear spectroscopy of atomic and molecular gases with special emphasis placed on the analysis of dynamic and stochastic kinetic processes The entire presentation is based on quantum kinetic equation for one particle density matrix with generalized collision integral of Boltzmann type Consistent sequential analysis of spectroscopic optical and gas kinetics phenomena is universally believed to be possible only on the basis of this equation Apparatus of quantum kinetic equation has been significantly developed over the last two decades in connection with problems of nonlinear spectroscopy and gas kinetics in the field of laser radiation Engineers and research workers students and post graduates in the fields of optics spectroscopy quantum electronics and physical kinetics will welcome this book **Statistical Theory of Open Systems** Yuri Lvovich Klimontovich, 1995
