Disputing the Deluge Darko Suvin, 2021-12-02 Featured on the 2021 Locus Recommended Reading List For over 50 years Darko Suvin has set the agenda for science fiction studies through his innovative linking of scifi to utopian studies formalist and leftist critical theory and his broader engagement with what he terms political epistemology *Disputing the Deluge* joins a rapidly growing renewal of critical interest in Suvin's work on scifi and utopianism by bringing together in a single volume 24 of Suvin's most significant interventions in the field from the 21st century with an Introduction by editor Hugh O'Connell and a new preface by the author Beginning with writings from the early 2000s that investigate the function of literary genres and reconsider the relationship between science fiction and fantasy the essays collected here each a brilliant example of engaged thought highlight the value of scifi for grappling with the key events and transformations of recent years Suvin's interrogations show how speculative fiction has responded to 9/11 the global war on terror the 2008 economic collapse and the rise of conservative populism along with contemporary critical utopian analyses of the Capitalocene the climate crisis COVID-19 and the decline of democracy By bringing together Suvin's essays all in one place this collection allows new generations of students and scholars to engage directly with his work and its continuing importance and timeliness

The Worlds of Dune Tom Huddleston, 2023-10-05 *The Worlds of Dune* presents a deep dive into the many different strands of inspiration from Zen Buddhism to Indigenous American tribal ritual that Frank Herbert wove into *Dune* and its sequels collectively the world's bestselling science fiction epic

New Boundaries in Political Science Fiction Donald M. Hassler, Clyde Wilcox, 2008 This book offers an interpretation of the evolution of a growing genre in literary film and television As a follow up to their 1997 collection *Political Science Fiction* Hassler and Wilcox have assembled twenty-four noted international scholars representing diverse fields of inquiry to assess the influential voices and trends from the past decade in *New Boundaries in Political Science Fiction* The terrors and technologies that permeate our daily lives have changed radically in the past decade further highlighting the underlying speculations on our contested future that remain the core of this genre In surveying the vast expanse of politically charged science fiction of recent years the editors posit that the defining dilemma for these tales rests in whether identity and meaning germinate from progressive linear changes or progress or from a continuous return to primitive realities of war death and the competition for survival The discussion of political implications ranges among writers from H.G. Wells Robert A. Heinlein Ursula Le Guin and Isaac Asimov to more radical recent voices such as Iain M. Banks William Gibson Joanna Russ Philip K. Dick and China Mieville While emphasizing the literature the collection also addresses political science fiction found on film and television from the original *Star Trek* through the newest incarnation of *Battlestar Galactica*

Existence David Brin, 2012-06-19 Bestselling award-winning futurist David Brin returns to globe-spanning high-concept SF with *Existence* Gerald Livingston is an orbital garbage collector For a hundred years people have been abandoning things in space and someone has to clean it up But

there's something spinning a little bit higher than he expects something that isn't on the decades-old orbital maps. An hour after he grabs it and brings it in, rumors fill Earth's infosphere about an alien artifact. Thrown into the maelstrom of worldwide shared experience, the Artifact is a game-changer: a message in a bottle, an alien capsule that wants to communicate. The world reacts as humans always do, with fear and hope and selfishness and love and violence and insatiable curiosity. [Discovering Dune](#)
Dominic J. Nardi, N. Trevor Brierly, 2022-08-01
Frank Herbert's *Dune* is one of the most well-known science-fiction novels of all time and is often revered alongside time-honored classics like *The Lord of the Rings*. Unlike Tolkien's work, the *Dune* series has received remarkably little academic attention. This collection includes fourteen new essays from various academic disciplines, including philosophy, political science, disability studies, Islamic theology, environmental studies, and Byzantine history, that examine all six of Herbert's *Dune* books. As a compendium, it asserts that a multidisciplinary approach to the texts can lead to fresh discoveries. Also included in this collection are an introduction by Tim O'Reilly, who authored one of the first critical appraisals of Herbert's writings in 1981, and a comprehensive bibliography of essential primary and secondary sources.

What Does a Martian Look Like? Jack Cohen, Ian Stewart, 2007-08-17
A fascinating and useful handbook to both the science and science-fiction of extraterrestrial life. Cohen and Stewart are amusing, opinionated, and expert guides. I found it a terrific and informative piece of work, nothing else like it. Greg Bear: I loved it. Larry Niven: Ever wonder about what aliens could be like? The world authority is Jack Cohen, a professional biologist who has thought long and hard about the vast realm of possibilities. This is an engaging, swiftly moving study of alien biology, a subject with bounds and constraints these authors plumb with verve and intelligence. Gregory Benford: A celebration of life off Earth. A hearteningly optimistic book giving a much-needed antidote to the pessimism of astrobiologists who maintain that we are alone in the universe, a stance based on a very narrow view of what could constitute life. A triumph of speculative nonfiction. Dougal Dixon, author of *After Man: A Zoology of the Future*.
Galactic Pot-healer Philip K. Dick, 1969
Sometimes even gods need help. In *Galactic Pot Healer*, that god is an alien creature known as The Glimmung, which looks alternately like a flaming wheel, a teenage girl, and a swirling mass of ocean life. In order to raise a sunken city, he summons beings from across the galaxy to Plowman's Planet. Joe Fernwright is one of those summoned, needed for his skills at pot-healing, repairing broken ceramics. But from the moment Joe arrives on Plowman's Planet, things start to go awry. Told as only Philip K. Dick can, *Galactic Pot Healer* is a wildly funny tale of aliens, gods, and ceramics.

The Believer, 2003
Science Fantasy Voices and Visions of Cosmic Religion
William W. Mountcastle, 1996
This book offers a new approach to comparative religion, suggested by science-fiction interpretations of traditional religious teachings. Each chapter focuses on a basic religious theme: God, Mediators, Ideal Community, and Human Destiny, that becomes part of a projected future theology that has been shaped by ideas from many religions and the extraterrestrial imperative.
