

# Network Node Manager i

Introducing Network Node Manager i (NNMI), a new generation of capabilities enabling NOCs to manage modern networks. NNMI Support Things, integrating IoT/IoE into centralized network events, helping you streamline work to reduce issues, improve system uptime and cut network operations management.

## Product Highlights

Reduce complexity and improve service levels by introducing a unified control plane for network events and alerts. Streamline operations and reduce issues by using a single view of network events and alerts across all network devices and services.

Streamline operations and improve service levels by introducing a unified control plane for network events and alerts. Streamline operations and reduce issues by using a single view of network events and alerts across all network devices and services.

- Single, centralized management view for all network devices and services
- Streamlined operations and improved service levels
- Reduced complexity and improved service levels

## Key Features and Capabilities

Integrate data from multiple sources to create a single view of network events and alerts. Streamline operations and reduce issues by using a single view of network events and alerts across all network devices and services.

Streamline operations and improve service levels by introducing a unified control plane for network events and alerts. Streamline operations and reduce issues by using a single view of network events and alerts across all network devices and services.

## Network Node Manager i Operational Efficiency

- Streamlined operations and improved service levels
- Reduced complexity and improved service levels
- Streamlined operations and improved service levels
- Streamlined operations and improved service levels
- Streamlined operations and improved service levels
