Tackling Gender Inequality: Definitions, Trends, and Policy Designs Baoping Shang, 2022-12-02 This paper identifies five key issues that are important for the continued efforts to tackle gender inequality i gender inequality needs to be distinguished from gender gaps Not all gender gaps necessarily reflect gender inequality as some gender gaps are not driven by the lack of equal rights responsibilities and opportunities by women and girls and this has important implications on policy designs to address gender inequity However the literature has paid little attention to this issue often using gender inequality and gender gaps interchangeably ii the evolving focus of gender inequality suggests there is still a long way to go to fully address gender inequality Particularly gender inequality is taking more subtle and implicit forms though the social and economic benefits from addressing the remaining gender inequality is still likely to be substantial iii addressing gender inequality benefits everyone not just women Thus the entire society should work together even for each individual s own interest iv both general policies and targeted gender policies can help address gender inequality However as gender inequality becomes more subtle and implicit targeted gender policies will likely need to play an increasing role which also makes separating gender inequality from gender gaps all that more important and v addressing gender inequality does not need to start with policies targeted at its root causes but needs to end with eliminating the root causes Only then any remaining gender gaps would only reflect preference and comparative advantage between men and women The paper concludes by discussing gaps in the literature and policy challenges going forward

1999 International Symposium on Technology and Society IEEE Society on Social Implications of Technology, 1999 The theme of the symposium is Women and Technology Historical Societal and Professional Perspectives The roles of women in technology are more diverse controversial and important today than ever before Since the 1950s women have tried to technologically empower themselves particularly by entering the engineering profession They have done so in great numbers although today it is glaringly obvious that women are still underrepresented in engineering Women in the field still face gender based obstacles expectations and biases despite decades of efforts to eradicate these problems These issues are addressed

Gender and Technology at Work Ellen Balka, Ina Wagner, Anne Weibert, Volker Wulf, 2024-04-04 This book brings together the vast research literature about gender and technology to help designers understand what a gender perspective and a focus on

intersectionality can contribute to designing information technology systems and artifacts and to assist organizations as they work to develop work cultures that are supportive of women and marginalized genders and people Drawing on empirical and analytical studies of women s work and technology in many parts of the world the book addresses how to make invisible aspects of work visible how to recognize women s skills without falling into the trap of gender stereotyping how to engage in improving working conditions and how to defend care of life situations and needs against a managerial logic It addresses challenges for design including many overlooked and undervalued aspects such as the complexities involved in human machine interactions as well as the need to create safe spaces for research subjects

Gender, Sex, and Tech! Jennifer Jill Fellows, Lisa Smith, 2022-07-29 In this timely collection gender sex and technology are explored through an intersectional and interdisciplinary lens Gender Sex and Tech provides insight into the ways that technology affects and is affected by cultural perceptions of gender and sex Through an examination of a range of past and present issues the text highlights our relationships to technology and illustrates how gendered relations are shaped and transformed through social and technological innovations Contributors bring to the fore feminist decolonizing and anti racist methods to examine our everyday uses of technology from the mundane to the surreal to the playful to the devastating Original research and scholarship is skillfully grounded in real world scenarios like revenge pornography gender bias in artificial intelligence menstrual tracking online dating and the COVID 19 pandemic inviting students to take a closer look at technological transformations and their impact on gendered lived experience and to consider how the benefits of technology are inequitably shared within society Centring Canadian scholars and Canadian perspectives without losing sight of the broader global connection Gender Sex and Tech is bursting with timely and of the moment content making this collection a must read for courses focused on gender and technology

Agricultural Commercialization, Gender Equality and the Right to Food Joanna Bourke Martignoni, Christophe Gironde, Christophe Golay, Elisabeth Prügl, Dzodzi Tsikata, 2022-09-22 This volume explores agricultural commercialization from a gender equality and right to food perspective Agricultural commercialization involving not only the shift to selling crops and buying inputs but also the commodification of land and labour has always been controversial Strategies for commercialization have often reinforced and exacerbated inequalities been blind to gender differences and given rise to violations of the human rights to food land work and social security While there is a body of evidence to trace these developments globally impacts vary considerably in local contexts This book systematically considers these dynamics in two countries Cambodia and Ghana Profoundly different in terms of their history and location they provide the basis for fruitful comparisons because they both transitioned to democracy in the early 1990s made agricultural development a priority and adopted orthodox policies of commercialization to develop the sector Chapters illustrate how commercialization processes are gendered highlighting

distinctive gender ethnic and class dynamics in rural Ghana and Cambodia and the different outcomes these generate They also show the ways in which food cultures are changing and the often problematic impact of these changes on the safety and quality of food Specific policies and legal norms are examined with chapters addressing the development and implementation of frameworks on the right to food and land administration Overall the volume brings into relief multiple dimensions shaping the outcomes of processes of commercialization including gender orders food cultures policy translation national and sub national policies corporate investments and programmes and formal and informal legal norms In doing so it offers insight not only on our case countries but also provides proposals to advance rights based research on food security This book will be of great interest to students and scholars of food security agricultural development and economics gender human rights and sustainable development
