Einstein Plus Two Petr Beckmann,1987 *Kicking the Sacred Cow* James P. Hogan,2004 Galileo may have been forced to deny that the Earth moves around the Sun but in the end science triumphed Nowadays science fearlessly pursues truth shining the pure light of reason on the mysteries of the universe Or does it As bestselling author James P Hogan demonstrates in this fact filled and thoroughly documented study science has its own roster of hidebound pronouncements which are Not to be Questioned And those who question them may face a modern day Inquisition As the author puts it This book is not concerned with cranks or simple die hards who are entitled to their foibles and come as part of life s pattern Rather it looks at instances of present day orthodoxies tenaciously defending beliefs in the face of what would appear to be verified fact and plain logic or doggedly closing eyes and minds to ideas whose time has surely come In short where scientific authority seems to be functioning more in the role of religion protecting doctrine and putting down heresy than championing the spirit of the free inquiry that science should be Among the dogma laden topics he examines are Darwinism global warming the big bang problems with relativity radon and radiation holes in the ozone layer the cause of AIDS and the controversy over Velikovsky Hogan explains the basics of each controversy with his clear informative style in a book that will be fascinating for anyone with an interest in the frontiers of modern science Book jacket **Einstein's Greatest Blunder?** Donald Goldsmith,1997 This brief and witty book by the award winning science writer Donald Goldsmith takes on key questions about the origin and evolution of the cosmos By clearly laying out what we currently know about the universe as a whole Goldsmith lets us see firsthand whether modern cosmology is in a state of crisis [Progress in Physics, vol. 2/2011](#) Dmitri Rabounski,Florentin Smarandache,Larissa Borisova, The Journal on Advanced Studies in Theoretical and Experimental Physics including Related Themes from Mathematics *And The Flowers Showered* Osho,2021-11-08 Burn your candle of life from both ends Burn it so intensely if it is finished in one second it is okay but at least you will have known what it is Only intensity penetrates And if you can live an intense life you will have a different quality of death because you will die intensely As life is so will the death be Osho [Einstein's Clocks and Poincare's Maps](#) Peter Galison,2013-10-20 More than a history of science it is a tour de force in the genre New York Times Book Review A dramatic new account of the parallel quests to harness time that culminated in the revolutionary science of relativity Einstein s Clocks Poincar s Maps is part history part science part adventure part biography part meditation on the meaning of modernity In Galison s telling of science the meters and wires and epoxy and solder come alive as characters along with physicists engineers technicians and others Galison has unearthed fascinating material New York Times Clocks and trains telegraphs and colonial conquest the challenges of the late nineteenth century were an indispensable real world background to the enormous theoretical breakthrough of relativity And two giants at the foundations of modern science were converging step by step on the answer Albert Einstein an young obscure German physicist experimenting with measuring time using telegraph networks and with the coordination of clocks

at train stations and the renowned mathematician Henri Poincaré president of the French Bureau of Longitude mapping time coordinates across continents Each found that to understand the newly global world he had to determine whether there existed a pure time in which simultaneity was absolute or whether time was relative Esteemed historian of science Peter Galison has culled new information from rarely seen photographs forgotten patents and unexplored archives to tell the fascinating story of two scientists whose concrete professional preoccupations engaged them in a silent race toward a theory that would conquer the empire of time *Einstein's Relativity* Dunlap Jamison McAdam, 1922 **Challenging Modern Physics** Al Kelly, 2005 Newton's Laws held for 300 years until Einstein developed the special theory of relativity in 1905 Experiments done since then show anomalies in that theory This book starts with a description of the special theory of relativity It is shown that Einstein was not the first to derive the famous equation $E=mc^2$ which has become synonymous with his name Next experimental evidence that cannot be explained by special relativity is given In the light of this evidence the two basic postulates of the special theory of relativity on the behaviour of light are shown to be untenable A new theory universal relativity is developed which conforms to the experimental evidence The movement of a conductor near a pole of a magnet and the movement of that pole near the conductor does not always give the same result It has been claimed that this contradicts relativity theory Experiments described in this book show that it is not special relativity but another basic law of physics that is contradicted Faraday's Law The Big Bang theory of the beginning of the universe is questioned and an alternative proposed The source of much of the mysterious missing dark matter that has been sought for decades by astronomers is located An explanation of the shapes of some galaxies is proffered This book presents an alternative to Einstein's special theory of relativity solves many problems left unanswered by special relativity gives a better fit to many phenomena and experimental data and is more philosophically appealing It is recommended to all people interested in fundamental issues of physics and cosmology Professor Andre Assis Brazil The book treats its subject properly not just as an impersonal set of equations but rather as a developing saga full of human triumph and failure One learns from both experimental results and simple logical argument that all is not well with modern physics Dr Neal Graneau Oxford University U K Irish engineer solves the dark secrets of space Sunday Times U K Einstein got relativity theory wrong Bangkok Post Thailand THE UNIVERSE AND DR.
