Wirum, 1992-06-01 *Taking Security Interests in Personal Property* Randy Rogers, 2009 This Action Guide is written from the perspective of counsel for the secured party It tells you what to do to perfect a security interest that will give your client priority over other creditors It assists you in selecting the appropriate method of perfection and takes you through the steps

to perfect a security interest in the particular type of collateral that secures your client's loan from computer software to fixtures. It also covers searches, preparation of a security agreement, continuation statements and amendments. This Action Guide addresses practice under revised Article 9 of the Commercial Code that became effective on July 1, 2001. It assumes that revised Article 9 has been adopted in all states relevant to a particular transaction. If a debtor resides in or collateral is located in another state, it will be necessary to determine whether that state has adopted revised Article 9. If not, the laws of that state must be consulted, especially for perfection and filing issues. Routledge Handbook of Space Law Ram Jakhu, Paul Stephen Dempsey, 2016-11-10. This handbook is a reference work providing a comprehensive, objective and comparative overview of Space Law. The global space economy reached 330 billion in 2015 with a growth rate of 9 per cent vis-à-vis the previous year. Consequently, Space Law is changing and expanding expeditiously, especially at the national level. More laws and regulations are being adopted by space-faring nations while more countries are adapting their Space Laws and regulations related to activities in outer space. More regulatory bodies are being created while more regulatory diversity from public law to private law is being instituted as increasing and innovative activities are undertaken by private entities which employ new technologies and business initiatives. At the international level, Space Law, both hard law and soft law, is expanding in certain areas, especially in satellite broadcasting and telecommunications. The Routledge Handbook of Space Law summarises the existing state of knowledge on a comprehensive range of topics and aspires to set the future international research agenda by indicating gaps and inconsistencies in the existing law and highlighting emerging legal issues. Unlike other books on the subject, it addresses major international and national legal aspects of particular space activities and issues rather than providing commentary on or explanations about a particular Space Law treaty or national regulation. Drawing together contributions from leading academic scholars and practicing lawyers from around the world, the volume is divided into five key parts: Part I: General Principles of International Space Law; Part II: International Law of Space Applications; Part III: National Regulation of Space Activities; Part IV: National Regulation of Navigational Satellite Systems; Part V: Commercial Aspects of Space Law. This handbook is both practical and theoretical in scope and may serve as a reference tool to academics, professionals and policy makers with an interest in Space Law.
