Intelligent Systems in Process Engineering, Part II: Paradigms from Process Operations, 1995-11-14 Volumes 21 and 22 of *Advances in Chemical Engineering* contain ten prototypical paradigms which integrate ideas and methodologies from artificial intelligence with those from operations research estimation and control theory and statistics Each paradigm has been constructed around an engineering problem e g product design process design process operations monitoring planning

scheduling or control Along with the engineering problem each paradigm advances a specific methodological theme from AI such as modeling languages automation in design symbolic and quantitative reasoning inductive and deductive reasoning searching spaces of discrete solutions non monotonic reasoning analogical learning empirical learning through neural networks reasoning in time and logic in numerical computing Together the ten paradigms of the two volumes indicate how computers can expand the scope type and amount of knowledge that can be articulated and used in solving a broad range of engineering problems Sets the foundations for the development of computer aided tools for solving a number of distinct engineering problems Exposes the reader to a variety of AI techniques in automatic modeling searching reasoning and learning The product of ten years experience in integrating AI into process engineering Offers expanded and realistic formulations of real world problems *Encyclopedia of Computer Science and Technology* Allen Kent, James G.

Williams, 2002-01-02 This supplement to the Encyclopedia of Computer Science and Technology looks at subjects ranging from algorithmic learning theory to statistical language modelling **Functional Programming** Kei Davis, John Hughes, 2012-12-06 Functional Programming is a relatively new area of computer science These proceedings contain 25 papers representing an excellent snapshot of the current state of functional programming and are written by the leading computer scientists in this area In some universities a functional programming language is used as the introductory teaching language and computer architectures are being designed and investigated to support functional languages
