Fast Finger Snacks:

The McDonaldization of Society George Ritzer, 2013 George Ritzer's *McDonaldization of Society* now celebrating its 20th anniversary continues to stand as one of the pillars of modern day sociological thought. By linking theory to 21st century culture, this book resonates with students in a way that few other books do, opening their eyes to many current issues especially in consumption and globalization. As in previous editions, the book has been updated and it offers new discussions of, among others, In N Out Burger and Pret A Manger as possible antitheses of McDonaldization. The biggest change, however, is that the book has been radically streamlined to offer an even clearer articulation of the now famous McDonaldization thesis.

New and Developing Sources of Food Proteins B.J.F. Hudson, 2012-12-06 The recent series of texts *Developments in Food Proteins* comprised in all seven volumes which were published in the course of the decade 1982-1991. Each volume contained inter alia one or more chapters that were concerned with new or developing sources of food proteins. Most of these have now been collected together in an updated and re-evaluated form for the present volume. *New sources of food proteins* includes those sources that are unconventional, that are still of very limited significance in market terms, or that are at present of very localized use. Several of these were included in *Developments in Food Proteins*. One of them, algae, appeared both in Volume 1 and in an updated form in Volume 7. It is therefore not included here. Others such as yeasts and bacteria have not yet increased in practical importance as potential food components beyond the long term promise already evident at that time. However, leaf protein as described in the present Chapter 10 has moved from the original rather crude concept to a much more sophisticated product in the form of Rubisco Fungal protein as Quorn. Chapter 11 has also proved to be potentially of real food value. Developing sources of food protein are those sources that have always been basic items in human diets.

Encyclopedia of Junk Food and Fast Food Andrew F. Smith, 2006-08-30 Eating junk food and fast food is a great all American passion. American kids and grownups love their candy bars, Big Macs and supersized fries, Doritos, Twinkies and Good Humor ice cream bars. The disastrous health effects from the enormous appetite for these processed fat and sugar loaded foods are well publicized now. This was particularly dramatically evidenced by Super Size Me 2004 filmmaker Morgan Spurlock's 30 day all McDonald's diet in which his liver suffered the same poisoning as if he had been on an extended alcohol binge. Through increased globalization, American popular food culture is being increasingly emulated elsewhere in the world, such as China, with the potential for similar disastrous consequences. This A to Z reference is the first to focus on the junk food and fast food phenomena from a multitude of angles in addition to health and diet concerns. More than 250 essay entries objectively explore the scope of the topics to illuminate the American way through products, corporations and entrepreneurs, social history, popular culture, organizations, issues, politics, commercialism and consumerism and much more. Interest in these topics is high. This informative and fascinating work with entries on current controversies such as mad cow disease and factory farming, the food pyramid, movie tie ins and marketing to children will be highly useful.
