

### Expanding the Framework for Business Ethics

Expanding the framework of business ethics, however, is not an easy task. It requires a deep understanding of the current state of the field and a willingness to challenge established norms. The authors argue that the current framework is too narrow and does not adequately address the complexities of the modern business environment. They propose a new framework that is more inclusive and comprehensive, one that takes into account the interests of all stakeholders and the broader societal context. This new framework would focus on the ethical implications of business decisions and actions, rather than just the legal or technical aspects. It would also emphasize the importance of transparency, accountability, and integrity in business practices. The authors believe that this expanded framework is necessary to ensure that business ethics remains relevant and effective in the face of rapid technological change and globalization.
