### Essay Sample on Kant vs Kierkegaard: History, Freedom, and Teleology Essay

## Introduction

Different philosophers provide different views on certain topics. However, different philosophers can also have similar views on certain topics. Many explanations draw their meanings from the views given by philosophers. In addition to drawing meaning, philosophy has aided in organizing ideas to give them significance. Various philosophers such as Kant and Kierkegaard hold different views on history, existentialist view of freedom, good and evil. While Kant holds to the philosophy that man is a free creature whose freedom is inextricably linked to the moral law which is indoctrinated by the specter of an all-knowing and omnipotent God. In contra, Kierkegaard holds to the view that man's freedom is for man for him to revisit to himself. In this regard, and in accordance with Kierkegaard, man is free and completely free in his creation and as a result responsible for that very freedom. The views of Kierkegaard and Kant have more difference than similarities.

## How Does Kierkegaard's Concept of History Challenge That of Kant?

Both Kant and Kierkegaard offer differing concepts about history. Kierkegaard believes in the incompatibility of freedom and necessity within history. From his perspective, the necessary laws of nature cannot demonstrate the presence of necessity in actuality. According to Kierkegaard, history is characterized by, has come into existence, hence it attributes to freedom but not a necessity. Moreover, history does not involve nature's history but human history alone. This is because although nature exists, it does not have a memory of its existence. Moreover, despite having the present, and future, nature is never free because it does not recognize its existence such as the past in a way that can decide on its present and future. In this regard, Kierkegaard posits that human beings are the only ones who can relate themselves to the past and can choose freely from their future. Hence, history can only be defined as human history rather than nature.

On the other hand, Kant believes in a teleological theory of nature where he posits that nature helps reason. Hence, unlike Kierkegaard who eliminates nature in his concepts of history, Kant considers nature as advancing the reasoning of human in understanding history. He, therefore, does not isolate nature from human history as Kierkegaard did. According to Kant, there are two forces at work in history and these include the morality and empirical dynamic of conflicting self-interests. In his view, Kant sees history as the realization of nature's secret plan to bring forth a perfectly constituted state as the only condition in which the capacities of mankind can be fully developed. History is a revolution that leads to different creatures and the evolution of humankind. Kant develops his telos of history from his philosophy of universal history. His view is advanced and enlightened by the cosmopolitan condition. This shows that the Kierkegaard's concept of history challenge that of Kant on the basis of incompatibility of freedom with the necessary laws of nature which cannot demonstrate the presence of necessity in actuality and on the basis that human history exists in isolation with nature's history. According to Kierkegaard, history is the process of coming into existence and in doing so history refers to human history. History is a continuous change that
