*The Great American Countryside, a Traveller's Companion* Val Landi, 1982      *The Great American Countryside* Val Landi, 1982      **The Changing American Countryside** Emery N. Castle, 1995

The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life

*Cincinnati Magazine* taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region      *Cinematic countrysides* Robert Fish, 2017-10-03

Recent years have witnessed an explosion of interest in the spatialities of cinema across the social sciences and humanities yet to date critical inquiry has tended to explore this issue as a question of the city and the urban For the first time leading scholars in geography film and cultural studies have been drawn together to explore the multiple ways in which ideas of cinema and countryside are co produced how film makes rural and rural makes film From the expanse of the American great west to the mountainous landscapes of North Korea *Cinematic Countrysides* draws on a range of popular and alternative film genres to demonstrate how film texts come to prefigure expectations of rural social space and how these representations come to shape and be shaped by the material and embodied circumstances of lived rural experience At the heart of this volume s varied apprehensions of the cinematic countryside is a concern to argue that ideas of rurality in film are central to wider questions of modernity and

tradition self and other nationhood and globalisation and crucially ones that are central to an account of the cinematic city
