Tondl,2012-12-06 Ladislav Tondl s insightful investigations into the language of the sciences bear directly upon some decisive points of confrontation in modern philosophy of science and of language itself In the decade since his *Scientific Procedures* was published in English Boston Studies 11 Dr Tondl has enlarged his original monograph of 1966 on the promise problems and achievements of modern semantics the main topic of his later work has been semantic information theory A Russian translation considerably expanded as a second edition was published in 1975 Moscow Progress Publishers with an appreciative critical commentary in the form of a conclusion by Professor Avenir I Uemov of Odessa Indeed many Soviet studies in the problems of the semantics of science show the same sort of philosophical curiosity about the relationship of meanings in scientific language to procedures in scientific epistemology that characterizes Tondl s work as in the work of Mirislav Popovich Kiev and Vadirn Sadovsky Moscow and their colleagues But we know that interest in these matters is world wide ranging from such classical topics as sense and denotation empiricist reduction vagueness and denotational opacity to the new and equally exciting topics of the semantics of non unique preference choices the nuances of informational synonymy and the semantics of a picture shape so briefly but beautifully sketched in Tondl s dense and promising last chapter We are pleased to have had Tondl s kind cooperation in producing this English edition actually a third edition of his research about semantics      *Pitman's Dictionary of Accident Insurance* James Beavan Welson,1928
