Borg, 1987 A Beginner's Guide to Doing Your Education Research Project Mike Lambert, 2012-09-05 Mike Lambert's book is a useful source of information helping to create and shape your research methods project. The book contains detailed chapters with easy to follow guidelines, tips and suggestions ensuring help at every step of the way from start to finish. Alexander Miesen, student Amsterdam University of Applied Sciences. In this basic guide, step by step advice is presented in a clear way and chapters take the reader through the entire process from planning and doing research to writing it up. Each stage is covered with detailed help on choosing a topic, drawing up research questions, doing the literature review, choosing and designing research methods, the ethics of doing research, analyzing data and collating and presenting findings. Features in the text include explanations of key research terms, activities with answers, progress sheets, case studies. This is an ideal text for undergraduate students undertaking their first ever research project, postgraduates pursuing Masters awards and teachers carrying out action research. **Conducting Educational Research** Daniel J. Boudah, 2011 Conducting Educational Research: Guide for Completing a Major Project provides concise, accurate guidance through the entire research process from developing and focusing research questions to searching the existing literature to selecting the most appropriate research design, measurement and analyses to interpretation and communication of outcomes. Each chapter represents a step in the process and begins with a concise overview of the topic. Each chapter includes features and activities that ensure the researcher is asking the right questions and producing a quality project. Educational Research Allyson Sesay, 2012. This book presents a rudimentary exposure to the field of educational research and an attempt to allay the unwarranted fear of those who perceive research as a highly technical and complex scholarly activity carried out by persons in the sciences. The author takes the position that anyone can do research and that it can be an interesting and very worthwhile experience. Educational research, particularly action research, which the author emphasizes, is an invaluable exercise about which everyone in education should be knowledgeable or at least be familiar. Starting with an explication of some salient concepts in the study of research (e.g. research educational research, research problem v research topic, hypothesis experimental v non experimental research), the book takes the reader through the process of conducting a research problem from problem selection and statement, significance review of literature, methodology, data analysis, findings to recommendations and conclusions. Detailed descriptions of the American Psychological Association (APA) style of

referencing with ample examples are provided The book is written in simple language so that even high school students will be able to acquire a fairly good understanding of each contents Though the primary target population is undergraduate students of education the contents are broad enough to provide a guide for students in other disciplines as well as whet the appetite of the general reader who seeks only a basic knowledge of research and or educational research
