

Essential Filmmaking Techniques: You Need These For Your Films!

1. Tilt & Pan

The most essential (and basic) filmmaking technique for aspiring filmmakers is tilt and pan. Both of these two terms represent a simple camera movement on a tripod, but they are slightly different:

- Tilt: A camera movement that tilts the tripod head up or down.
- Pan: A camera movement that pans the camera head from left or right.

2. Zoom

You might be surprised to hear that a zoom shot is actually not as common in filmmaking as you might think. In fact, if you were to watch your favorite movie you might only see 2-3 examples of a zoom shot in the entire film. Why is that?

Well, when it comes to cinematography, a zoom conveys a sense of urgency, focus, and connection with the subject matter. They often happen at pivotal or intense scenes in a movie. As such, zooms are often used sparingly in film (unless you're Edgar Wright).

3. Dolly & Trucking Shots

As you begin to grow as a cinematographer you will likely want to practice Dolly Shots and Trucking Shots. Like tilts and pans, Dolly Shots and Trucking Shots are slightly different filmmaking techniques:

- Dolly Shot: A movement where the entire camera moves forward or away from the subject.
- Trucking Shot: A camera movement where the entire camera system moves parallel to the subject.
