**Universities in the Flux of Time** Paul Gibbs, Oili-Helena Ylijoki, Carolina Guzmán-Valenzuela, Ronald Barnett, 2014-11-27 Higher education and the institution of the university exist in time their essential nature now continually subject to change change in students in knowledge in structure and in their own communities and those they service These changes are accompanied by a quickening of time leading to a heightened intensity of academic life Yet the nature of time in all the contemporary work on the university has been largely overlooked This is an important omission and *Universities in the Flux of Time* has gathered leading academics whose contributions to the volume raise a debate as to the influence and use of time in the university They do this in an exploration of how these changes are perceived in higher education and how these affect its temporality from local national and global perspectives By dealing with the time within the university the book opens new spaces for the development of the university and civic society The book develops an interdisciplinary understanding of the temporal issues of engaging with the past present and

future of higher education and its institutions through consideration of the increased speed demanded for the production of able students and innovative research to the accountability pressures from central governments and commerce Reflecting on these issues in the higher education sector Universities in the Flux of Time is split into three parts with each one addressing time and its multiple relationships with the university Past present and future Knowledge and time Living with time This volume will provide essential reading for those on higher education studies courses as well as a wider audience of managers practitioners policy makers academics and students and from many disciplinary perspectives including sociology organisation studies social psychology and the philosophy of education

**Fast Capitalism** Ben Agger,1989-01-01 *The Chinese Students' Monthly* ,1928 **Gender, Culture, and Power** Ben

Agger,1993-11-30 Agger develops a critical theory which confronts the challenges of feminism and postmodernism in order to address postmodernity adequately Drawing on first generation critical theory of Horkheimer Adorno and Marcuse and second generation critical theory of Habermas Agger argues for the priority of critical theory over the antitotality perspectives of postmodernism and feminism Although Frankfurt critical theory postmodernism and feminism are often viewed as divergent Agger develops an argument for synthesis outlining what he calls the logic of feminist postmodern critical theory He then applies the logic to particular social political textual and cultural problems Building especially on the feminist critique of the domination of women s reproductive activities by a male standard of value this new theoretical logic connects social problems heretofore seen as separable especially those which derive from the intellectual agenda of multiculturalism *Global Literacy* ,1999 *Studying Society and Environment* Rob Gilbert,1996 Introductory guide to curriculum planning and teaching in studies of society and environment at secondary school level Designed for teacher education courses as well as for use by practising teachers It reviews theory and practice and discusses topics such as planning investigations and evaluation Includes references and an index The editor is associate professor of education at James Cook University *Integral Europe* Douglas R. Holmes,2000-10-29 Over the past 15 years the project of advanced European integration has followed a complex secular and cosmopolitan agenda As that agenda has evolved however so have various hard line populist movements with goals diametrically opposed to the ideals of a harmonious European Union Spearheaded by figures such as Jean Marie Le Pen the controversial leader of France s National Front party these radical

movements have become increasingly influential and because of their philosophical affinities with fascism and national socialism politically worrisome In *Integral Europe* anthropologist Douglas Holmes posits that such movements are philosophically rooted in integralism a sensibility that in its most benign form enables people to maintain their ethnic identity and solidarity within the context of an increasingly pluralistic society Taken to irrational extremes by people like Le Pen integralism is being used to inflame people's feelings of alienation and powerlessness the by products of impersonal transnational fast capitalism The consequences are an invidious politics of exclusion that spawns cultural nationalism racism and social disorder The analysis moves from northern Italy to Strasbourg and Brussels the two venues of the European Parliament and finally to the East End of London This multi sited ethnography provides critical perspective on integralism as a form of intimate cultural practice and a violent idiom of estrangement It combines a wide ranging review of modern and historical scholarship with two years of field research that included personal interviews with right wing activists among them Le Pen and neo Nazis in inner London Fascinating provocative and sobering *Integral Europe* offers a rare inside look at one of modern Europe's most unsettling political trends

reinvent work and democratic political practices Portraying the human face of global change Fast Forward shows how overlapping social movements wrestle with economic and political marginalization and initiate highly diverse but related attempts to change the way the world works

**Dangerous Writing** Tony Scott, 2009-03-10 Outlines a political economic theory of composition Connects pedagogical practices in writing classes to their broader political economic contexts and argues that the analytical power of writing is prevented from reaching its potential by pressures within the academy and without that tend to wed higher education with the aims and logics of fast capitalism Since the 1980s and the social turn in composition studies and other disciplines scholars in this field have conceived writing in college as explicitly embedded in socio rhetorical situations beyond the classroom From this conviction develops a commitment to teach writing with an emphasis on analyzing the social and political dimensions of rhetoric By focusing on the structures of labor and of institutions that enforce those structures the author finds teachers and administrators are too easily swept along with the inertia of a hyper commodified society in which students especially working class students are often positioned as commodities themselves A critique of the field of composition as much as it is a critique of capitalism From publisher description
