market power wielded by large corporations on innovation and productivity gains And finally the short sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end The debate over the causes of the broken economy laissez faire government poorly managed globalization the rise of technology in favor of the few or yet another reason is wide open Stakeholder Capitalism A Global Economy that Works for Progress People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems our current system will continue to fail us To help us see our challenges more clearly Schwab the Founder and Executive Chairman of the World Economic Forum looks for the real causes of our system's shortcomings and for solutions in best practices from around the world in places as diverse as China Denmark Ethiopia Germany Indonesia New Zealand and Singapore And in doing so Schwab finds emerging examples of new ways of doing things that provide grounds for hope including Individual agency how countries and policies can make a difference against large external forces A clearly defined social contract agreement on shared values and goals allows government business and individuals to produce the most optimal outcomes Planning for future generations short sighted presentism harms our shared future and that of those yet to be born Better measures of economic success move beyond a myopic focus on GDP to more complete human scaled measures of societal flourishing By accurately describing our real situation Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems Chapter by chapter Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and country by country company by company and citizen by citizen glue them back together in a way that benefits us all

developed ones that have had profound and sometimes startling effects on cultural production and theory Surveying recent cultural history and theory Buell shows how our understanding of cultural production relates closely to transformations in models of the world order The Global Economic System Iain Wallace,1992 **The World's Monetary System** Jo Marie Griesgraber,Bernhard G.
