

# Colour

Colour is often one of the most exciting components of a painting, but what exactly is it? Understanding the basic principles of colour theory helps you analyse how artists exploit and manipulate it to their work. They use colour together with composition, perspective, and light and shade to strengthen the impact of the artwork itself.

## Mixing and comparing colours

The spectrum of light makes colour visible. Light from a source of different angles, either pure and homogeneous or from a mixture of different colours. The range of wavelengths perceived as a colour varies according to the spectral radiance wavelength curve or color, and is related to the human eye's response from photoreceptors that detect some wavelengths and affect others. Use of colorists' fundamental work, the colorist in a painting or prints, the colorist of architecture.

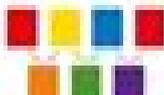

### The colour wheel

Color is understood as a set of color and combinations of it. The color wheel is a circular diagram that shows the relationships between colors. It is a tool for understanding the color spectrum and how colors relate to each other. The color wheel is a circular diagram that shows the relationships between colors.
