**Essence of Diplomacy** Christer Jönsson, Martin Hall, 2005-08-02 *Essence of Diplomacy* explores the essential timeless features of diplomacy drawing on the historical record of over three millennia In their effort at making international relations IR theory relevant to diplomacy and diplomacy relevant to IR theory the authors identify three essential dimensions of diplomacy communication representation and the reproduction of international society *The Evolution of Diplomatic Methods* Robert Louis Goerder, 1947 [The Moral Purpose of the State](#) Christian Reus-Smit, 2009-11-02 This book seeks to explain why different systems of sovereign states have built different types of fundamental institutions to govern interstate relations Why for example did the ancient Greeks operate a successful system of third party arbitration while international society today rests on a combination of international law and multilateral diplomacy Why did the city states of Renaissance Italy develop a system of oratorical diplomacy while the states of absolutist Europe relied on naturalist international law and old diplomacy Conventional explanations of basic institutional practices have difficulty accounting for such variation

Christian Reus Smit addresses this problem by presenting an alternative constructivist theory of international institutional development one that emphasizes the relationship between the social identity of the state and the nature and origin of basic institutional practices Reus Smit argues that international societies are shaped by deep constitutional structures that are based on prevailing beliefs about the moral purpose of the state the organizing principle of sovereignty and the norm of procedural justice These structures inform the imaginations of institutional architects as they develop and adjust institutional arrangements between states As he shows with detailed reference to ancient Greece Renaissance Italy absolutist Europe and the modern world different cultural and historical contexts lead to profoundly different constitutional structures and institutional practices The first major study of its kind this book is a significant addition to our theoretical and empirical understanding of international relations past and present

**Diplomacy in the 21st Century** Paul Sharp, 2019-05-02 This book provides an introduction to the theory and practice of diplomacy and its vital role in an era of increasing international uncertainty The work employs a distinctive diplomatic perspective on international relations and argues that the experience of conducting diplomacy gives rise to a set of priorities first the peaceful resolution of disputes second the avoidance of unwanted conflict and third the minimization of the intensity of violent conflict where it has become unavoidable It argues that changes in the international system require a shift in priorities from the diplomacy of problem solving by building institutionalized cooperation to the diplomacy of managing relationships between people Divided into three sections the first examines what is meant when we talk about diplomacy why we need diplomats and the operations of the modern diplomatic system of states The second discusses the three bads about which people generally worry bad leaders bad media and bad followers The idea of bad is considered in terms of the moral character professional competence and the consequences of what people do for us The final section discusses diplomacy and bad diplomats reviewing what people can do to help

themselves and the professionals be good diplomats This book is intended as a primary text for courses in international diplomacy and as a supplementary text for courses on contemporary issues in international relations

**The Trends in Modern Diplomatic Practice** Roberto Regala,1959 Diplomacy Christer Jönsson,Richard Langhorne,2004 The study of diplomacy in many respects the engine room of international relations has been marked by a revitalisation in recent years This brings together the seminal writings in the field to provide a unique reference work on this essential institution for the conduct of international affairs

**Diplomacy in Modern European History** Laurence W. Martin,1966 *Announcement* Graduate Institute of International Studies (Geneva, Switzerland),1928 The Evolution of Diplomatic Method ,1950

**Immunity and International Criminal Law** Yitiha Simbeye,2017-03-02 Two events occurred in 1998 that had far reaching consequences for international justice the adoption of the Statute for the International Criminal Court by the Diplomatic Conference of Plenipotentiaries in Rome the Rome Statute and the arrest in London of former President Pinochet for crimes against humanity These events are for many the culmination of attempts to seek legal redress against those who commit international crimes This stimulating ground breaking book debates the issues raised by international crimes It highlights the two competing international law needs that must be addressed in this situation the pursuit of international justice which international criminal law purports to uphold and the maintenance of international peace and security an important rationale for the immunities of state officials abroad
