

- Push or Pull? Pulling allows better maneuverability but pulling puts strain on the back, always try to push the load instead if you can
- Pushing the load:
  - Keeps the back and spine straight
  - Uses the stronger and larger leg muscles and bones
- Pulling the load:
  - Employees pulling pallet jacks are using their backs more than their legs to move the load
  - Bending forward creating a curvature in their spine making them more susceptible to back injuries
  - The jack is not designed to be pulled by one or both arms
  - Exception: Making small adjustments in the positioning of the load, while standing erect
